Dexion Germany Team visits Romania to learn more about the Shuttle System

Last week a team of Sales Specialists from Dexion Germany, together with the Sales Export Manager, Mr. Stefan Isaakson arrived in Rasnov to take part in a product training regarding the **Pallet Shuttle System**, a semi-automated storage system that Constructor Group is selling across Europe after its successful launch in Romania several years ago.

They were trained regarding the technical details of the system, the specifics of Shuttle Installation and Aftersales with a Great focus being placed on the advantages that the system provides over high-density pallet racking solutions.

During the visit, our German colleagues could see how the components for the Shuttle System were made as well as witness live the system in operation at the biggest installation in the country.
