Description

Special Solutions > Garage & Workshop products

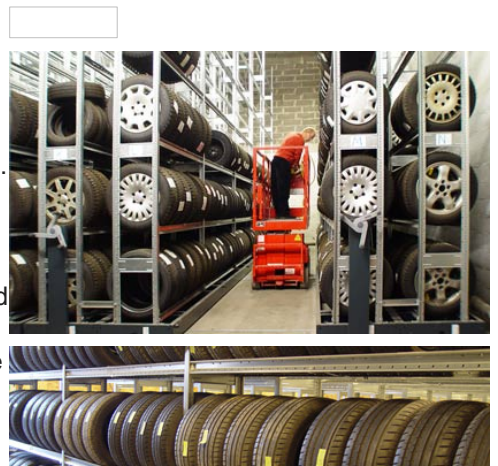

Within this product group for workshop storage you will find storage solutions for small or bulky items. From special storage for tyres to storage machines for spare parts or components which require secure or dust free storage.

This product range covers "general storage", the storing of tools as well as components and fittings of different kinds for garages and workshops. This means that all kinds of different storing solutions can occur in a small workshop; from palletised goods or the storage of long goods, to valuable tools & instruments or small parts in plastic bins within the shelving systems.

- **Pallet racking** is a basic product for bulky material or goods in master cartons.
- **Shelving system Hi280** is a multi storage system for smaller parts or plastic boxes in system.
- **Long goods** racking available as cantilever
- Cloth lockers and work tables are frequent occurrence products in garage and workshop environments
- Vertical carousels **Paternoster** machines and **Tornado** storage automates are both rational storage systems for small, valuable and often sensitive components.

The determining factor is always to find the best storage and handling system in order to get an optimal solution from economical as well as ergonomically point of view towards the employees as well as the operation.

Specifications

The basis of these concepts is our well known **pallet racking system** P90 and **shelving system** Hi280, in single or multi tier designs with mezzanine floors in between. The long goods storage systems utilise **cantilever racking** for heavy loads and light loads cantilever in hot-dipped galvanized design. For lockable safe storage the solution is to use our range of lockers/Cabinets.

- Pallet racking P90 Silverline standard height 12 m without joints and tailor made in loads and width dimensions.
- Shelving system Hi280 available in stationary and mobile designs as one or multi tier installation. Adapted to required load capacity 100-400 kg/shelf, height and width.
- Cantilever racking according to requirements in dimensions and loading capacity.
- Storage cabinets and clothing lockers according to required design of size and equipment.
- **Storage machines**. Vertical carousels, **Paternoster** and **Tornado**. Adapted to customer requirements according to loading capacity and dimensions.
