Description

Optim is a versatile shop fitting system for many purposes. It's solid structure allows for displays of large volumes goods and merchandise. Optim shop fitting is adaptable and all-equipped – from a corner shop to a supermarket. It is suitable to agricultural and hardware stores, garden stores, grocery stores, discount stores and specialty shops.

Optim shop fitting consists of frames, horizontal long span beams and shelves as well as wide range of accessories which simplify the display of even the most cumbersome products. In DIY and hardware stores the size of products differs from small items to large machinery. Highly flexible Optim shop fittings accommodate effortlessly all hardware products, which can also be protected with wire mesh doors. Products can be hung, put on a shelf or into a basket, stacked, stood up, kept in deep wire basket shelves, stored on pallets, hung on rails, displayed individually or in a group. Big or small products, shelves can always be adjusted to suit the dimensions and requirements.
